# SOLIDWORKS<sup>®</sup> EDUCATION 2013-2014 Product Installation Instructions

### Preparation

- Verify that your system meets the criteria specified in <u>www.solidworks.com/System\_Requirements</u>.
- Back up all SolidWorks files (parts, assemblies, and drawings, document templates, sheet formats, library features, and form tools) before upgrading to SolidWorks 2013. Files you open and saved in SolidWorks 2013 cannot be opened in earlier versions.
- To minimize disk space consumed, please consider uninstalling your older Education Edition and using a new installation of the new Education Edition product. If you uninstall the older version please be sure to also uninstall Simulation products, along with older versions of eDrawings, DWGeditor, etc.
- Locate your Serial Number (S/N). The number typically begins with 9710 (Network) or 9700 (Stand Alone). NEW Customer S/N is located on the front of the box on a sticker. CURRENT Customer S/N is located inside SolidWorks under HELP then ABOUT SOLIDWORKS. If you cannot find or you have misplaced your number, contact your local educational reseller to obtain one.
- Before you uninstall a previous version of SolidWorks please make sure to transfer your license by going to help/transfer licenses.
- Uninstall any alpha, beta, or pre-release versions of the SolidWorks software.

Please Note: These instructions are for the installation of:

- SolidWorks Education Edition
- SolidWorks Student Edition
- SolidWorks Student Engineering Kit
- SolidWorks Student Design Kit

For Network License Installation Instructions click here.

## SOLIDWORKS<sup>®</sup> EDUCATION 2013-2014 PRODUCT INSTALLATION INSTRUCTIONS

**Note:** Before beginning the installation process, please be sure to close out of all SolidWorks programs currently open on your computer.

1. Insert DVD. When DVD is inserted, The "Welcome to the SolidWorks Installation Manager" window will appear; make sure Individual (on this computer) is selected. Click Next.
