

Optimize your templates to take advantage of the intelligence of SolidWorks® in every document that you create.

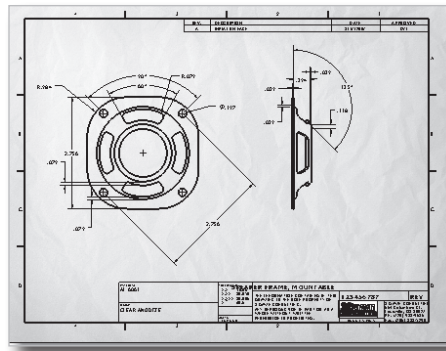

Quickly create templates for SolidWorks®

The Template Wizard quickly guides you through the process of creating or fixing SolidWorks® templates. In just 8 steps you can create a customized drawing template for your needs.

The Template Wizard helps you with:

- Border Design
- Title Block Design
- Units and Tolerances
- Anchors
- Tables
- Fonts
- Document Properties

In just 5 steps a user can create customized part and assembly templates.

New SolidWorks® users:

- 10 Tutorials to help you understand everything you ever wanted to know about creating your templates.
- Over 80 pages of help.
- 4 different pre-designed Title Block sets for parts and assembly.
- Over 100 Title Block elements to build your own custom title block.

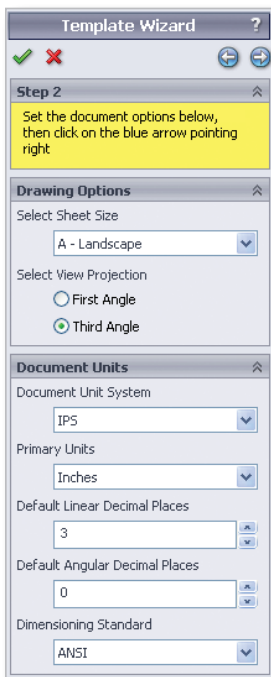

AutoCAD® users:

- AutoCAD® Import Tutorial to get your template into SolidWorks® correctly
- The Template Wizard automatically adjusts its menus to help you add SolidWorks® intelligence to your drawing template.

Existing SolidWorks® users:

- Fix common issues with Templates such as:
 - Grey border and title block lines
 - Title Block text not linked to model or drawing properties
 - Additional page variable not set correctly.
 - Fonts not consistent.

“This will help me save money for years to come because every document will start off on the right foot.”

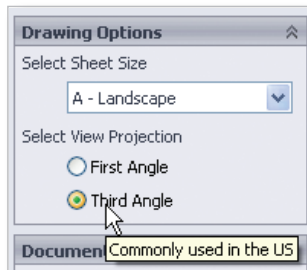

The default SolidWorks templates are inadequate for 99 percent of all users.

<< The Template Wizard is completely integrated inside the SolidWorks® software. Simply install and run inside the SolidWorks® software.

The Template Wizard eliminates repetitive tasks (such as setting the fonts in multiple areas) and maximizes your efficiency (such as setting the second page variable).

The Template Wizard synchronizes drawing and model properties for maximum efficiency.

When starting from a blank template the Template Wizard will help you follow the standard you specify – such as ANSI Y14-1 2005. >>

Companies are using the Template Wizard to get up and running quickly.

“We don’t have a few days to create templates. We need to be doing design work right away.”

System Requirements:

Windows XP/Vista; 32 or 64-bit
SolidWorks 2008 or newer

Purchase Information:

The Template Wizard can be downloaded from www.SolidworksTemplates.com or contact your reseller for purchase. For more information send questions to sales@SolidworksTemplates.com.
