

## The PhotoWorks™ addin

***30 days free of charge for testing purposes!***

### Key benefits:

- One click renderings after doing some global settings
- Save your PhotoWorks™ settings and image quality
- Load previously saved PhotoWorks™ settings and image quality
- Preview with the aspect ratio of the output image
- Have a statistical overview of all renderings in a log file
- Open the last rendered image
- Map keys to commands of TPicMan on your 3DConnexion™ device

Your picture is only one click away!

Save global picture settings, automatically generate unique file names for your pictures. Save time and annoying inputs.

Save your PhotoWorks™ settings e.g. for high, medium and low quality to switch quickly between a first draft to high quality rendering.

Find the PhotoWorks™ settings of already made pictures.

WYSIWYG rendering with the preview command. The preview image is shown with the aspect ratio of the output image.

Open your last rendered image from the toolbar.
