

Manufacturers Are Embracing Artificial Intelligence

The 3DS Technology Barometer Artificial Intelligence¹ finds that half of manufacturing executives have positive opinions of artificial intelligence (AI) — 54% are intrigued, and 48% are excited.²

A majority of manufacturers also find AI “highly applicable” to a range of broad manufacturing activities:

But for manufacturers to get the most out of AI, they’ll need to address challenges:

Technology budgets

44% indicate technology budgets are a challenge to the application of AI.

Are you ready to invest to generate optimal returns from AI?

Current data quality

40% indicate current data quality is a challenge to the application of AI.

Is your firm’s data hygiene and ability to capture/leverage data ready to deliver successful AI outcomes?

Get your manufacturing operations and data ready for AI with **SOLIDWORKS**.
