

5 FAST FACTS

SOLIDWORKS FOR CONSUMER GOODS

Design customizable, reliable, innovative and more sustainable product to stay ahead of consumer demand with SOLIDWORKS®.

1.

Tailored for Personalization

Whether it's modular furniture or customizable options for appliances or baby gear home layouts, SOLIDWORKS empowers designers to create unique, made-to-order solutions that meet individual demand tastes for customizable and requirements products.

2.

Visualization for Better Decisions

With photorealistic rendering tools, SOLIDWORKS Visualization helps bring ideas to life, making it easier to refine aesthetics or confidently present designs to clients.

3.

Streamlined Prototyping and Testing

Use SOLIDWORKS Simulation to virtually test designs for performance and durability, ensuring you can deliver high-quality, safe products efficiently and cost-effectively.

4.

Sustainable by Design

SOLIDWORKS provides tools like material optimization and life cycle assessment to help design eco-friendly products, from energy-efficient fixtures to sustainable furniture.

5.

Smart Home Integration Made Simple

Create innovative IoT-enabled products with the SOLIDWORKS Expanded Portfolio, from mobile devices to all of your connected lighting products systems to advanced home security solutions, ensuring seamless functionality and design.
