LEARN EIGHT WAYS SOLIDWORKS CAN HELP GROW YOUR BUSINESS WHILE MEETING YOUR UNIQUE PRODUCT INNOVATION NEEDS, TODAY AND IN THE FUTURE.

01 FASTER TIME TO MARKET

Getting alignment across an organization, from design and manufacturing to managers and executives, is important for any company no matter how big or small. **SOLIDWORKS** makes alignment easier—streamlining collaboration among stakeholders and enhancing design efficiency. Designers and managers control who can view and comment on work, creating focused feedback loops that enable clearer communication, fewer revisions, and faster manufacturing. With it you can assemble a unified team—including customers, suppliers, and partners—establishing a dynamic product development environment where innovation happens more naturally and which products get to market faster.

02 INDUSTRY-RECOGNIZED CREDENTIALS

Because **SOLIDWORKS** software is so widely used, being proficient in its use is an asset for job seekers in many industries. **SOLIDWORKS** certifications, such as **Certified SOLIDWORKS Associate (CSWA)** and **Certified SOLIDWORKS Professional (CSWP)**, validate skills and make résumés stand out, which can save you time when evaluating prospective talent. When considering a new hire, knowing they have proven proficiency in **SOLIDWORKS** is assurance they can use design tools associated with faster project completion times and fewer errors.

“The software is constantly evolving, both in big ways and through little added features. Every time you click the mouse one time less it’s an improvement on the software.”

-Michael Lord, Product Development & Engineering, Trakka Pty

04 EASY, SEAMLESS CONNECTION

All **SOLIDWORKS** Design solutions connect to the **3DEXPERIENCE** platform, a cloud-based platform that serves as a single source of truth for connecting people, ideas, data, and processes. It can help businesses transform their entire operations, or simply streamline everyday tasks, like sharing files with collaborators or CAD-aware storage without the need for PDM vaults and expensive servers.

03 USER-BASED SOFTWARE ENHANCEMENTS

For more than 30 years, the **SOLIDWORKS R&D** team has been driven by user feedback. Today 90% of our software improvements are based on user suggestions and implemented through a decision-making process that prioritizes enhancements with the greatest value for the users.

05 ACCESS TO MORE TOOLS

Dassault Systèmes, the parent company of **SOLIDWORKS**, is a globally recognized leader in technology and innovation. The platform is the innovation hub it created to better serve its vast array of clients. This means **SOLIDWORKS** clients have access to the **3DEXPERIENCE** platform and the **SOLIDWORKS** portfolio, featuring tools that have been hand-picked for **SOLIDWORKS** users based on their ability to offer seamless access to advanced manufacturing and simulation solutions—all on a single platform.
