

ROBOTICS AND AUTOMATION

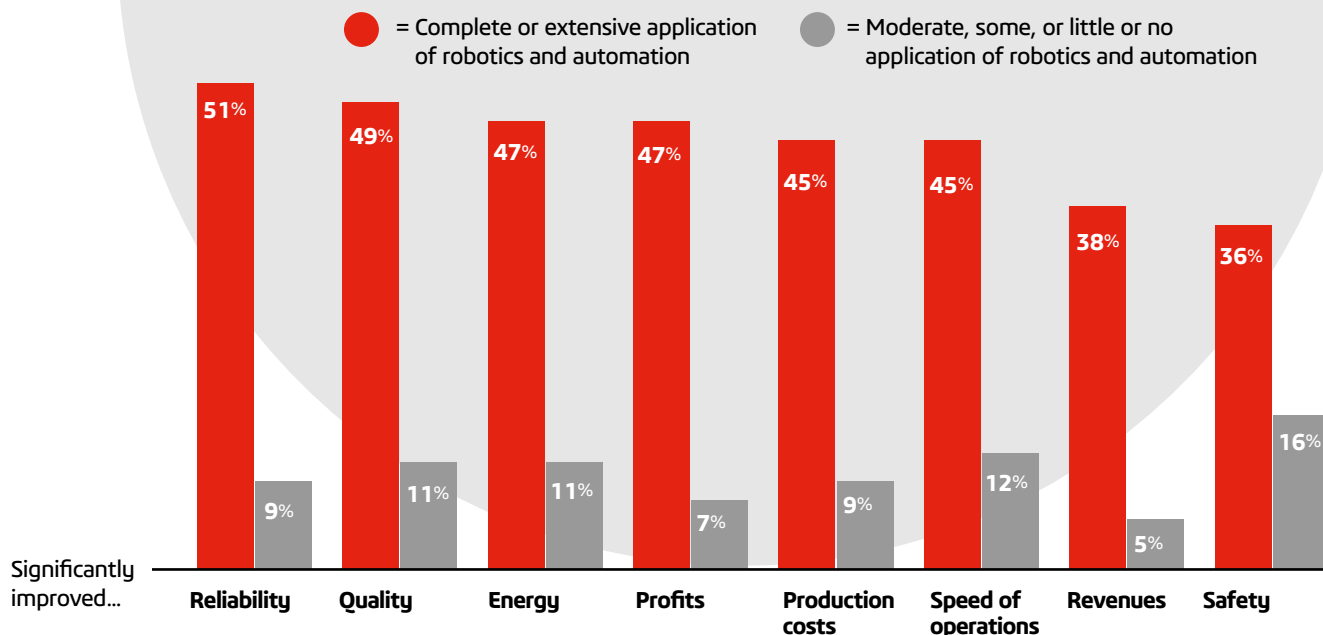

Drive Major Improvements in Productivity and Profitability — for Manufacturers of *All* Sizes

The 3DS Technology Barometer Robotics & Automation¹ finds that manufacturers with complete or extensive application of robotics and automation have improved a wide range of metrics—in the past year.

For example, **87% improved profits** vs. just 46% of other manufacturers.

How? By using **robotics and automation** to significantly improve their operations performances!

**Looking to improve your production performances?
Look to robotics, automation — and 3DS.**
