

SOLIDWORKS CERTIFIED PARTNER PRODUCTS

INTEGRATED. ASSOCIATIVE. CERTIFIED.

Get the power you need to finish the job right with SolidWorks Certified Partner Products.

From knowledge-based engineering (KBE) and mold design software solutions to computer-aided manufacturing (CAM) tools—you'll have everything you need to get your products to market faster.

Integrated

Data export just got easier. A lot easier. With single-window integration, all the tools you need work together using the same design data. Which means you can work directly in the native SolidWorks® environment, instead of exporting models to a standalone product. And with our Certified Partner Products, you can take advantage of unique SolidWorks capabilities like Configurations, PropertyManager, and the FeatureManager® design tree.

Associative

Like SolidWorks software, Certified Partner Products are fully associative. When you make design changes, they update data automatically or warn you that additional changes are necessary. So you can be sure that your data is always in sync. Always.

Certified

Our certification team rigorously evaluates all of our Certified Partner Products, making sure they comply with SolidWorks standards. So you can rest assured that they will look and feel like SolidWorks and work with each new SolidWorks release.

We're always evaluating new solutions for our Certified Partner Products. Visit www.solidworks.com and the Partner Products area for an up-to-date listing.
