Eligibility for Student Edition License; Distinctions from Commercial Version. You acknowledge that Student Edition Licenses are provided to individual students and faculty at accredited educational institutions at prices that are significantly less than the prices to commercial users. As a consequence, Student Edition Licenses contain use restrictions that are not found in commercial licenses of the Software. Only students and faculty who meet the following criteria are qualified to purchase Student Edition Licenses:

— You are a current, degree-, diploma-, or certificate-seeking student or full-time faculty member at an accredited educational institution. A degree-, diploma-, or certificate-seeking student is defined as a student who can confirm enrollment in three credit hours of courses per semester and is accepted into a degree- or diploma-granting program OR can confirm enrollment in a certificate-granting program having a duration of four or more months.

— You plan to use the Software and the files created by the Software for your personal learning purposes ONLY, e.g., not for in-person, remote or online instruction; independent consulting work; or any commercial purpose whatsoever. You may, however, use the Software and such files for any *preparation* of instructional materials for your own use.

Please note the following features in the Student Edition product:

- A student license for the Software expires after the number of months specified on the package, i.e., 12 months; does not include Subscription Service; and is not upgradeable.
 - The Software uses a soft-lock mechanism to limit installation to one computer only.
 - The Software contains on-screen and printing features that identify the software and the related files as the “SolidWorks Student Edition,” making it unsuitable for use in a professional environment; furthermore, files created by the Software may be prevented from being read by commercial versions of DS SolidWorks software.
 - The packaging for the Student Edition uses the English language only; however, the Software has foreign-language versions and may be installed using any one of such language versions.
